

MSS Cape Town is set up in such a way that we can serve in practically all languages and areas of language expertise.

The strength of MSS Cape Town is our recruitment and procurement department, which recruits, verifies, tests, approves and, if necessary, adjusts the required capacities both strategically and ad-hoc based on your project's language requirements. For requests with high volume or in "exotic" language combinations, we may need a little lead time in order to plan and reserve the appropriate capacity. We only work with translators who translate into their native language and who have experience and knowledge in the relevant field.

Our range of language recruitment is also applicable to **subtitles, transcriptions & more!**

We have experience in the following languages:

- Afrikaans
- Amharic
- Albanian
